DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn in part to the nucleic acid of SEQ ID NO: 1 and the nucleic acid encoding the polypeptide of SEQ ID NO: 2, classified in class 536, subclass 23.5.
- II. Claims 1 and 4, drawn in part to the nucleic acid encoding the polypeptide of SEQ ID NO: 4, classified in class 536, subclass 23.5.
- III. Claims 1 and 5, drawn in part to the nucleic acid encoding the polypeptides of SEQ ID NO: 6, classified in class 536, subclass 23.5.

The inventions are distinct, each from the other because of the following reasons:

Groups I-III are directed to different products related by virtue of encoding polypeptides with thrombospondin activity. However, they are patentably distinct inventions for the following reasons. Groups I-III are directed to different nucleic acid molecules with different sequences, structures, and use, are not required one for the other, and encode a different polypeptide with unrelated amino acid sequences. Furthermore, a search and examination of all these Groups would result in an undue burden since the searches are not co-extensive. Accordingly, restriction is deemed proper.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement can be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
